TIPS FOR MOUNTING YOUR MOTOR:

1. Mount your motor base on the floor in the direction that the adjusting bolt will PULL the belt tension.
2. It is recommended that you DO NOT tighten the mounting bolts before adjusting the belt tension.
3. It is recommended that you DO NOT use an impact wrench to tighten belts.
4. For double adjusting bases, alternate tightening of the two (2) adjusting bolts, three (3) turns each using a hand tool only.
